Terminology

The concept of a “compa-ratio” plays an important role in our compensation philosophy. A compa-ratio describes a co-worker’s actual base pay relative to “market pay” for a similar job. Market pay, in turn, is determined by aggregating many salary surveys from around the country and adjusting for differences in the local cost of living. In general, our policy is to pay co-workers not less than 80% and not more than 120% of market pay (The Executive range is 75% - 125%). Thus, a compa-ratio of 100% means that the co-worker’s pay is at the midpoint of the range.

The concepts of “Exempt,” “Non-Exempt,” and “Executive” job classifications also play an important role in our compensation philosophy. These concepts are defined below.

- **Non-Exempt:** A co-worker who is paid by the hour and eligible for overtime. A non-exempt co-worker’s pay range has compa-ratios of 80% (minimum) to 120% (maximum).
- **Exempt:** An exempt co-worker’s pay range has compa-ratios of 80% (minimum) to 120% (maximum).
- **Executive:** An exempt co-worker who is responsible for managing a core area of the credit union. An executive co-worker’s pay range has compa-ratios of 75% (minimum) to 125% (maximum).

Challenges in Attraction, Retention & Turnover Related to Compensation

Note: Attracting higher level lending positions, specifically home and commercial lenders. Low unemployment rate, low labor-force participation rate, COVID-19 pandemic, and increased competition on wage making it harder to compete for talent in general.
